Machine Learning LMS By Emerging Rule

Washington D.C. June, 16, 2018 - As individualized learning continues to gain ground, *Emerging Rule* sustains the improvement of individualized learning methods through the R&D of *LevelShip™*, its patent-pending Machine Learning LMS. With the application of Artificial Intelligence to education technology, the organization explores new horizons.

"From Atlanta Innovators (US-China Innovation Alliance initiative to 'Ideas Nuevas' (Peru's BCP innovation competition), we have been gaining momentum and advocating on the advantages of using Machine Learning as an EdTech foundation on the way to creating better and more comprehensive educational methods", explained Felipe Castro Guiles, CEO of the corporation.

In the past decade, Machine Learning has given us self-driving cars, practical speech recognition, effective web search, and a vastly improved understanding of the human genome. With *LevelShip™*, the startup intends to continue to expand its applications.

Moreover, *LevelShip* is carefully tailored to improve the individual development of its users by applying the advantages of getting computers to act without being explicitly programmed.

"Emerging rule means an invaluable guidance in the intellectual development of our childhood, focusing in a dynamic way in their attitudes and preferences according to our world", adds Bertha Santocoy, Ph.D., Legal & Political Adviser to Emerging Rule.

The corporation's short-term plans include a visit to NYU Steinhardt, Edtech Accelerator powered by StartED & VentureOut this July 2018 in NYC. To schedule a meeting with the founders, contact Sebastian Dommaria.

About Emerging Rule

Emerging Rule is guided by four principles: individual teaching and learning, passion for education reform and modernization, commitment to children rights, and futurist thinking. *LevelShip™* is an initiative to improve primary, secondary, undergraduate, and graduate tuition levels; to conduct cognitive assessments of students, determine optimal instructional techniques & tackle K-12 education requirements.

Emyode Unveils New Learning Management Platform

Specialized in Microsoft technologies software solutions, *Emyode* expands its expertise and unveils its modular learning management platform *Captivo* (formerly *Training Manager*).

This announcement reinforces Emyode's primary mission of supporting companies in their digital transformation, particularly by digitizing and centralizing all activities related to employee learning within a single platform.

Emyode has proven expertise in compliance management in the aeronautics sector with *Training Manager* and is now conquering new industries with *Captivo*. Our products goal is to revolutionize learning management and experience with an application that combines flexibility and simplicity. With this new vision, Emyode also intends to expand its reach in the North American market.

To meet the exponential need of integrating learning at the core of their growth strategy, Emyode wants to shape *Captivo* in collaboration with its customers, based on their business reality. *Captivo* aims to make the learning experience attractive and allow employees to increase their skills through entertaining and motivating training. Built on the latest Microsoft technologies and based on the Azure cloud, the new *Captivo* platform integrates with Microsoft Teams collaboration environment and supports all forms of training.

The purpose of this transition is to better reflect Emyode's vision and innovation strategy, but also its proven expertise in software development as a Microsoft Gold Partner.

"*Captivo aims to be an innovation in corporate training by offering a single and integrated learning ecosystem into the daily workflow. The platform has been designed as a learning hub, able to evolve as companies and employees grow. Our long-term vision is to offer our customers the possibility to integrate new specific modules based on Microsoft technologies such as artificial intelligence, machine learning and augmented reality. Our strength is undoubtedly the scalable aspect of the platform, which will enable customers to adapt their learning management solution according to their growth objectives and future challenges, in order to anticipate tomorrow's businesses and guarantee their future viability.*" - *Rafael Robitaille, CEO of Emyode*

Captivo is a collaboration tool for human resources, employees and businesses. The enhanced solution streamlines administrative management, harmonizes talent management data and reduces training costs.

This refined platform is designed to ensure the professional and personal development of employees by offering a single experience that meets the fulfillment needs of each employee in a specific way. *Captivo* helps create a corporate culture where learning is the key to employees, customer, and partner satisfaction, thereby enhancing business performance.

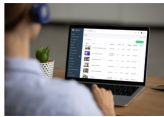

This launch is supported by a new website to *Captivo* and the e-learning market, as well as a new branding.

About Emyode

Emyode is a firm made of specialists that have been powered by current and emerging Microsoft technologies for over 15 years. As a Microsoft Gold Partner, Emyode develops new applications, modernizes existing solutions and ensures their management and monitoring, all with one goal in mind: to provide peace of mind during the evolution of its clients' applications. Convinced that the key to a company's success is its relationship with its employees, Emyode promotes best practices in human resources management and maintains open communication, which ensures that its employees are engaged and mobilized. It is to this extent that the company wanted to offer an innovative learning platform that rebalances traditional training processes.

About Captivo

As an evolution of the *Training Manager* solution, *Captivo* is a Montreal-based learning management platform powered by the software development company Emyode. Based on the Azure cloud, *Captivo* is a modular platform designed to meet the needs and growth objectives of its clients. By integrating the latest Microsoft technologies, *Captivo* is a tool that simplifies human resource management, enhances employee development and growth, and increases the performance of the company and its business partners.

"Our strength is undoubtedly the scalable aspect of the platform, which will enable customers to adapt their learning management solution according to their growth objectives and future challenges"
